

Internet Browser– Customisation (Homepage, Bookmarks)

We all have our favourite webpages that we visit regularly using our internet browser of choice. Instead of manually navigating to these webpages, you can instead set them as your home or startup pages. This way, these pages will load automatically whenever you open your browser.

- a. To create bookmarks, click the small **Star** button in the top right of your browser window
 - b. To create bookmark folders, right-click the Bookmarks bar and select **Add folder**; you can then left-click, hold and drag bookmarks and folders around as you see fit
6. Now select the **On startup** tab on the left; here you can set one or several pages to automatically load whenever you open Google Chrome
7. Select the **radio** button to the left of **Open a specific page**. click **Add a new page** and copy-paste the web address you want as in Step 4; repeat this step to add as many startup pages as you desire
- a. Alternatively, open all the pages you want as separate tabs in your browser then click **Use current pages**

Mozilla Firefox

1. Open Mozilla Firefox, click the three horizontal lines

Microsoft Edge

1. Open
